
1) Will FileSpy NT work with Novell servers?

No. FileSpy NT was designed to work on systems using Window NT Server only. Get the Novell compatible version of FileSpy from <http://ic.net/~kusluski>

2) How do I select multiple users in a list?

Press down the CTRL key and click on the user name.

3) How do I sort by specific columns in a list?

Click on the column heading to sort in ascending/descending order.

4) I have an ascii text file open on the file server but FileSpy NT tells me there is no one using the file, Why?

FileSpy NT will not work with text files. It will, however, work with most binary files with extentions of EXE (Executable), XLS (Excel), COM (Executable), DOC (Word), DWG (AutoCAD Drawing), MDB (Access Database), etc.

5) How come when I scan a particular file I'm getting duplicate user IDs?

Most likely because that user has that file open on more than one machine.

6) How do I send a message to all users using a file?

Click the Select All Button to select all users. Next, click the Send Message Button, type a message and click the OK Button.

7) Can I monitor file usage by user and store the results to a text file?

Yes, to do this click the "In Use" Button on the main screen. Next, select "Refresh every n seconds" and select "Save to log file USAGE.TXT". Each time the list is refreshed the log file will be built. The location of the log file is in the same path as the FileSpy Nt application.

8) How do I purchase FileSpy NT?

When you purchase FileSpy NT I email you a special code which you use to register it thus allowing you to use FileSpy NT indefinitely (i.e. the 40-day time constraint is removed). At the present time methods of payment include credit card with RegNow (www.regnow.com) and PayPal (www.paypal.com), check, money order, or wire transfer of funds to my bank account. Pricing for FileSpy NT is only \$29.95 for a single-user license or only \$149.95 for a site license. If you want to purchase by check, money order, or wire transfer please email me for details at:

kusluski@mail.ic.net

Note: If you purchase FileSpy NT with RegNow you will receive the registration code immediately. If you purchase using PayPal you will receive the registration code within the same day. If you use any other method of payment you will receive the registration code in a few days.
